

RAW-based Workflow:

Unsorted RAW Images --> FastRawViewer --> Adobe Lr/ACR or other RAW Converter

Culling _Rejected [1] - [5]
Check the rejected images, and if necessary move some (or all) of them from the _Rejected subfolder back to the Source Folder or any other chosen folder.
Then the _Rejected subfolder can be cleared.

For a quick start, please look at the "Tips"; for detailed instructions, please read the manual.

[1] Open Folder Modes:

- Standard "Open Folder" Mode
- Open Folder with Subfolders
- Open Filelist
- Hotfolder Mode
- Slideshow

[4] Technical Tools for Culling based on RAW data:

- RAW Histogram
- OE-, UE indication and Statistics
- Per-channel View
- Focus Peaking
- Shadow Boost
- Highlight Inspection

[6] Integration with External Programs

- Choose up to 10 external programs,
- Launch an external program directly from FastRawViewer for a single or multiple selected files.
- Assign Keyboard shortcuts to external programs and match an Image display

[2] Viewing Files in Different View Modes:

- Grid View Mode
- Single View Mode
- Multi-window View Mode (2 / 4 windows)

[5] Image Adjustments

- Orientation
- Exposure (brightness)
- White Balance
- Contrast (Tone) Curve

User adjustments are recorded as XMP sidecar files in the current folder with images

[7] Fully Customizable Interface
For customization use:

- FastRawViewer Preferences
- Keyboard Shortcut Editor
- Panels' Option gear icons

*** We do not recommend using "move" operations while working with a memory card or a network server. Also we do not recommend assigning labels and ratings while working with a memory card.**
